

Product/Process Change Notification

Change Theme layout change of wafer

Proposed First Ship Date 2024/10/20

Last Date 2024/10/20

Change Keywords Optimize the layout of You Wang chip and improve the antistatic ability.

Detailed description of change(s)

1. Optimize the layout of chip and improve the antistatic capability. The layout difference before and after the change is as follows, and the remaining materials and product specifications remain unchanged.

变更前 (before) 变更后 (after)

2. The wafer fab will stop the production for the wafer versions with low antistatic capacity.

Electrical and Reliability Performance

The electrical performance and reliability of product comply with the specification.

Affected Product List

See the attachment.

Approval:

Position: Vice President (Quality)

Date: 2024-7-22
