Main Purpose of the Role

Radiography programmes have seen sustained growth across undergraduate training. We are seeking to appoint an enthusiastic and motivated Diagnostic Radiographer to join our dynamic and forward-thinking academic team as a lecturer. This is a 0.6 FTE post and offers an exciting opportunity to contribute to the delivery and development of our highly respected BSc (Hons) Diagnostic Radiography course, and postgraduate MSc programme provision, preparing students for professional practice in a rapidly evolving healthcare environment.

The School of Nursing, Midwifery, Allied and Public Health is committed to excellence in teaching, research, and professional practice. Our Diagnostic Radiography course is well-established, with strong links to regional NHS partners and a focus on producing highly skilled, compassionate graduates. The teaching facilities include a state-of-the-art clinical simulation suite, ward and operating theatre environments, a fully functional Philips Digital Radiography Suite with mobile imaging equipment, a dedicated high-quality IT suite for image interpretation and opportunities for inter-professional learning.

The successful candidate will contribute to teaching, assessment, module leadership, and curriculum development across undergraduate and postgraduate provision, with a focus on delivering high-quality, evidence-based education.

About the Role:
In this dynamic and multifaceted role, the successful candidate will be supporting students during their academic and practice placements and educating the next generation of healthcare professionals. The role requires a commitment to academic excellence, fostering an environment of innovative learning, and advancing the field of Diagnostic Radiography through impactful research and practice. You will bring specialised knowledge and skills to these critical areas, enriching our courses and contributing to the education of the future Diagnostic Radiography workforce. Your experience will be invaluable in developing curriculum content, guiding research projects, and mentoring students who are keen to pursue careers in these areas. Collaborating with clinical partners, you will take joint responsibility for sourcing clinical placements and expanding current placement resources whilst allocating and supervising students on placements.

Teaching and Education:
You will be at the forefront of delivering high-quality learning and teaching and ensuring that students receive a first-class education in Diagnostic Radiography. You will be involved in ensuring that the curriculum content reflects the latest research and is responsive to contemporary professional issues and standards. Supervision and mentorship of students is a key element of the role, guiding them in both their academic and professional development. You will utilise a range of teaching methods and technologies to enhance the learning experience,

and your assessments and feedback will support student progression. Your involvement will extend to design and delivery of interprofessional modules, ensuring that our curriculum remains relevant and forward-thinking.

Research and Scholarship:
You will be encouraged to contribute to high quality research as part of this role, for example collaborating on interdisciplinary research initiatives with staff and students, creating a supportive and stimulating environment for their studies. Support to develop and/or extend your research profile will be available to publish your findings in peer-reviewed journals and to attend/present at conferences both nationally and internationally.

Practice Placement
Maintaining your professional registration and clinical practice, you will develop and sustain relationships with clinical partners, enhancing practice-based learning. Your clinical expertise will be integrated into both teaching and research activities. Continuous professional development will be key, ensuring that you remain current in the field of Diagnostic Radiography.

Leadership and Administration:
Your contributions will extend to the ongoing development and management of the Diagnostic Radiography course. Taking on administrative roles such as module leadership will be part of your duties. You will participate in quality assurance processes and will help maintain high standards of education and research and engage in outreach and public engagement activities to promote the Diagnostic Radiography course and the wider university.

Support and Development:
You will not be alone on this journey. Our team, including the BSc and MSc Course Directors and other experienced academics and practitioners, will provide you with the guidance and support needed to excel in your role. We offer comprehensive orientation to professional standards and other relevant protocols, ensuring you are well-equipped to succeed. Furthermore, we are committed to supporting you in gaining your initial teaching qualifications which is a requirement of the academic post.

Additional Information:
This position offers great career flexibility and an exciting, varied workload. We aim to promote education as a foundational pillar of your practice, embarking you on a thrilling journey that opens doors to teaching and clinical mentoring opportunities while being part of an engaged and dynamic learning community.

This role is a perfect fit for a dedicated Diagnostic Radiographer who is eager to integrate their experience from clinical practice with academic responsibilities, contribute to the education of future professionals, and ensure the highest quality educational experiences. We look forward to welcoming a passionate and innovative individual to our team, someone who will inspire and lead the next generation of healthcare professionals.

Main Duties	
1	Deliver engaging and innovative teaching across the Diagnostic Radiography curriculum
2	Contribute to module leadership and course development
3	Support student learning through tutorials, academic supervision, and pastoral care
4	Develop and mark assessments in line with university and professional body requirements
5	Engage in scholarship, research, or professional practice activity

6	Contribute to quality assurance processes and course accreditation (e.g. HCPC, Society of Radiographers)
7	Foster strong relationships with clinical placement providers
8	Deliver engaging and innovative teaching across the Diagnostic Radiography curriculum
