UNIVERSITY OF WARWICK

Job Description

Job title	Postdoctoral Research Assistant in Cell Biology
Department	Life Sciences
Grade	FA6

Job purpose (a brief summary of the role)	Undertake research in order to support the work of Dr. Iqbal Dulloo Research Group and the School of Life Sciences in order to develop and enhance its reputation, both internally and externally. Assist the Project Leader and, where appropriate, project collaborators in the successful execution of the project.
Duties and responsibilities	**RESEARCH** • Help establish a sound research base within the department in order to assist the development of research objectives and proposals for own or joint research. • Conduct individual and collaborative research projects. • To publish research outcomes in appropriate journals of international standing and to publish and disseminate the result of research to other reputable outlets. • Translate knowledge of advances in the subject area cell biology and virology into research activity. • May contribute to preparing proposals and applications to external bodies, e.g. for funding and contractual purposes, to support a developing research agenda. • May present information on research progress and outcomes to bodies supervising research, e.g. steering groups. • May contribute to the preparation of papers for steering groups and other bodies. • Communicate complex information (orally and in writing) and material of a specialist or highly technical nature. • Continually update own knowledge and understanding cell biology and virology **TEACHING AND LEARNING SUPPORT** • Could be expected to contribute to the teaching and learning programmes in the department. • Assist in the supervision of student projects and the development of student research skills. • May be involved in the assessment of student knowledge and supervision of projects. **ADMINISTRATION AND OTHER ACTIVITIES** • May be required to attend departmental meetings and to participate (where necessary) in other committees and working groups within the department, the faculty and the University. • Ensure compliance with health and safety in all aspects of work. • Work within budget constraints. The duties and responsibilities outlined are not intended to be an exhaustive list but provide guidance on the main aspects of the job. You will be required to be flexible in your duties.

Person Specification

The Person Specification focuses on the essential and desirable knowledge, skills, experience and qualifications required to undertake the role effectively. This is measured by (a) Application Form, (b) Test/Exercise, (c) Interview, (d) Presentation.

Essential Criterion No.	Essential Criterion Description	Measured by
E1	Good honours degree and possession of a PhD/DPhil in cell biology, virology or a related field.	A & C
E2	Demonstrable experience in studying membrane proteins and/or pathogenic viruses.	A,C & D
E3	Have a track record of leading contributions to publications/pre-prints appropriate to your career stage.	A,C & D
E4	Evidence of specialist knowledge in lab techniques using mammalian cell systems including DNA/RNA/protein extraction and analysis, molecular cloning, flow cytometry, microscopy, plaque assays, CRISPR/Cas9 gene editing.	A,C & D
E5	Effective communication skills (oral and written), including the ability to articulate and present research results to an audience.	A,C & D
E6	Ability to work independently and/or as part of a team on research programmes, including supervision/training of others.	A,C & D
E7	Strong interpersonal skills, including commitment to support an inclusive and equitable research environment.	A,C & D

Desirable Criterion No.	Desirable Criterion Description	*Measured by*
D1	Evidence of ability or potential to contribute to the development of funding proposals in order to generate external funding to support research projects.	A,C & D
D2	Evidence of work-related external activities such as outreach activities/research panels or similar, or, of running research projects (outside of PhD studies).	A,C & D
D3	Evidence of input into research culture activities, University or other relevant committee memberships etc.	A,C & D
