## DISCLAIMER

All information related to the financial performance and business results of Neuromeka Co. (hereinafter referred to as "the Company") included in this document has been prepared in accordance with Korean Generally Accepted Accounting Principles (K-GAAP) and Korean International Financial Reporting Standards (K-IFRS). This document contains "forward-looking statements" regarding the Company's future sales plans and other projections. These statements, plans and projections reflect potential growth targets based on future estimates rather than past performance, and use terms such as "forecast," "outlook," "plan," "expect," "E," "F," etc. These "forward-looking statements" may be significantly affected by changes in the business environment, and due to such uncertainties, actual business results in the future may differ materially from these projections. Furthermore, various indicators have been prepared considering the current market conditions and the Company's management goals and policies. Results may vary due to rapid changes in market conditions, the investment environment, and strategic goal adjustments by the Company. Therefore, investors should always check the investment prospectus and the Company's public disclosures before making investment decisions. The information presented in this document shall not have any effect on investors' investment results under any circumstances, and thus the Company shall not bear any legal responsibility in this regard.

With simple and cost-effective  
robot platforms and solutions

# Company Intro

A comprehensive robot platform and solution company leveraging robot control and software technologies

ROBOT AS A TOOL  
ROBOT AS A SERVICE  
ROBOTS FOR EVERY WORKPLACE

## Company Summary

Company Name	Neuromeka Co.		
CEO	Park Jong-hoon		
Core Businesses	Robot development and manufacturing, solution provision, component business, provision of robot service		
Established Date	February 14, 2013		
No. of Employees	146 (as of March 2025)		
Locations	Seoul	Pohang B.O	Changwon B.O
			
Locations	USA B.O	China B.O	Vietnam B.O
			
Official Website	www.neuromeka.com		

## CEO Information

World-renowned expert in robot dynamics and control, and a pioneer who has led South Korea's robotics technology for 30 years

박종훈 CEO

### Career

- Neuromeka, Founder and current CEO (2013~present)
- POSTECH, Affiliated Professor (2014~present)
- SimLab, CTO (2007~2012)
- POSTECH Center for Intelligent Robot, Senior Researcher (2005~2007)

### Achievements

- Awarded the Industrial Service Medal (Machinery, Robotics, and Aviation Division)
- Selected by the National Academy of Engineering of Korea as one of the [100 Future Technologies to Lead Korea in 2025]
- Awarded the [Technology of the Year] award by the Korea Robotics Society
- Won the Prime Minister's Award for Robotics Technology
- Won the Silver Prize in the Robotics Division at the Samsung HumanTech Paper Awards

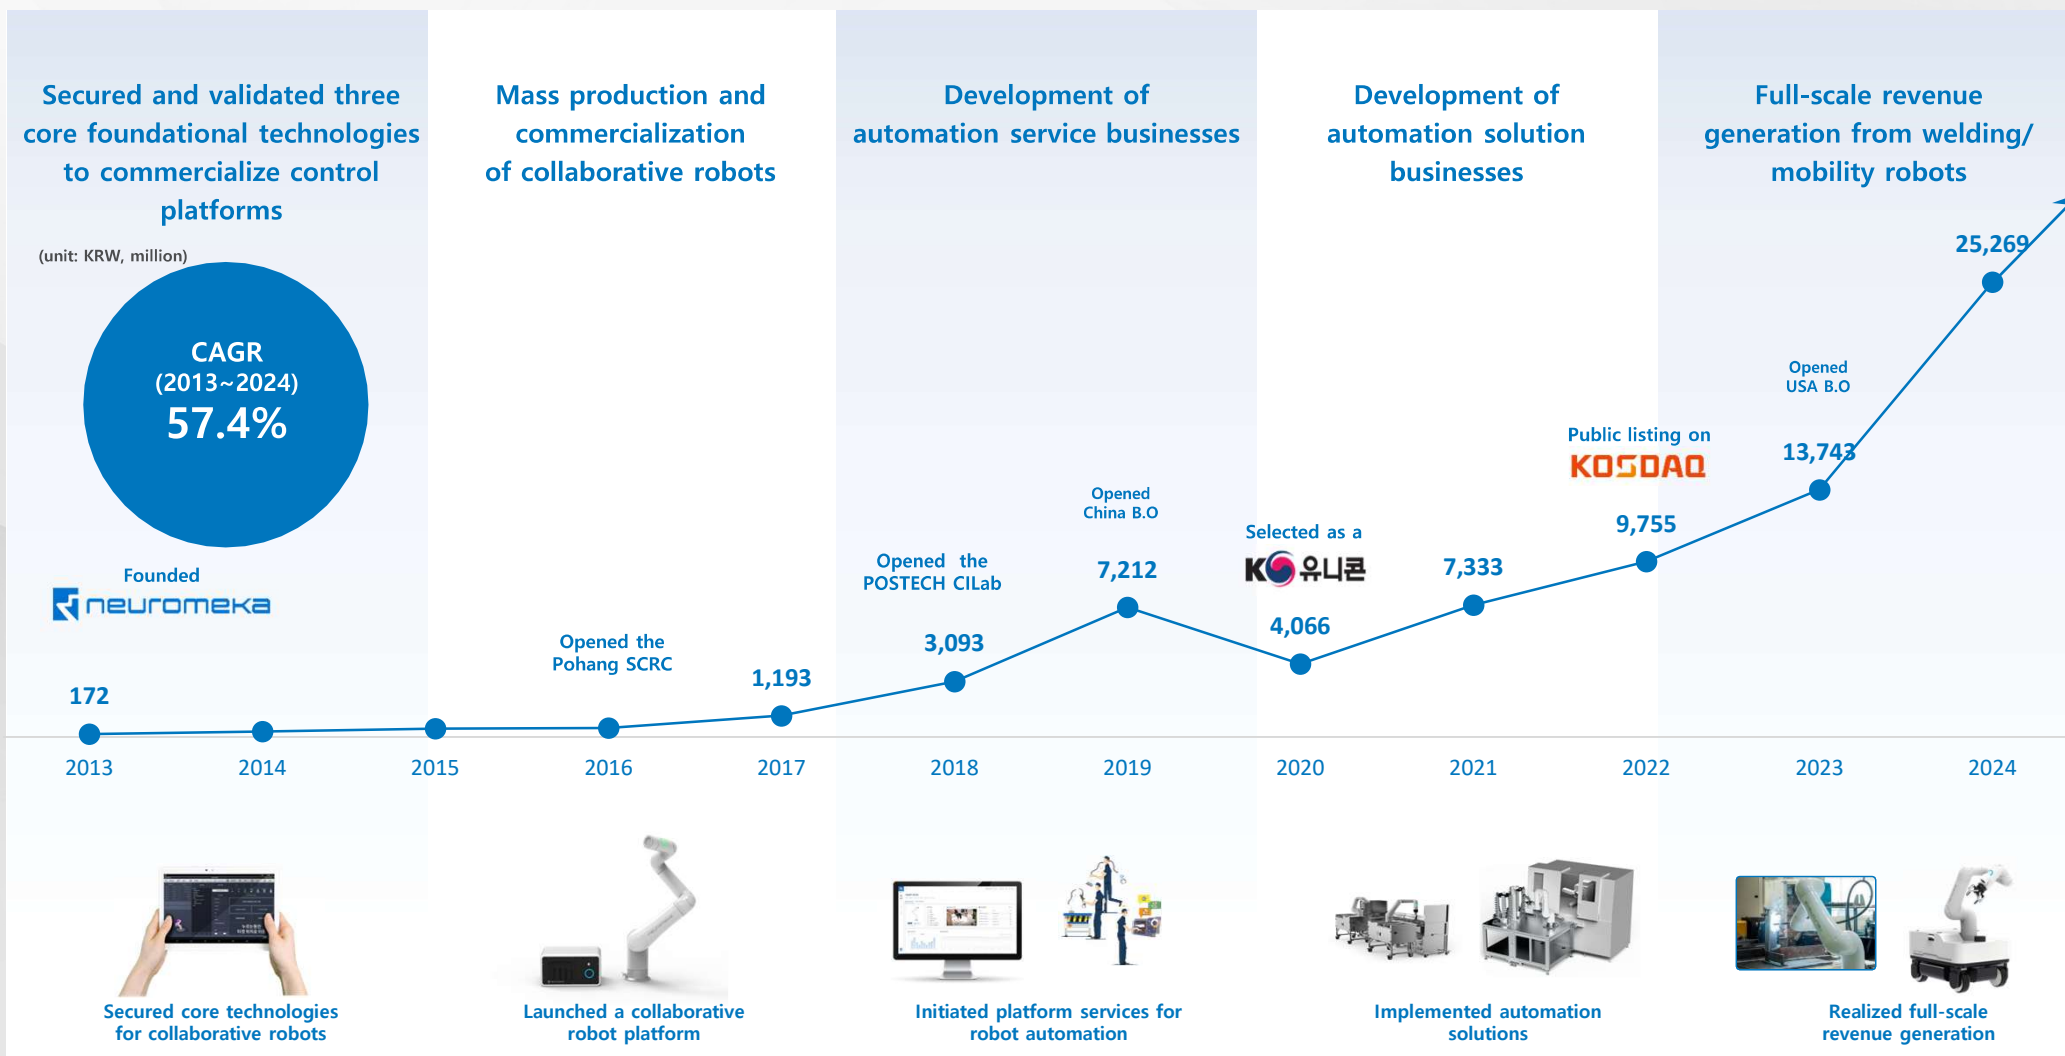

### Education

- Visiting researcher at Hiroshima University
- Bachelor's, Master's, and Doctoral degrees in Mechanical Engineering from POSTECH
- 15 papers published in international journals
- 29 papers presented at international conferences
- 42 registered domestic patents

# Growth Story

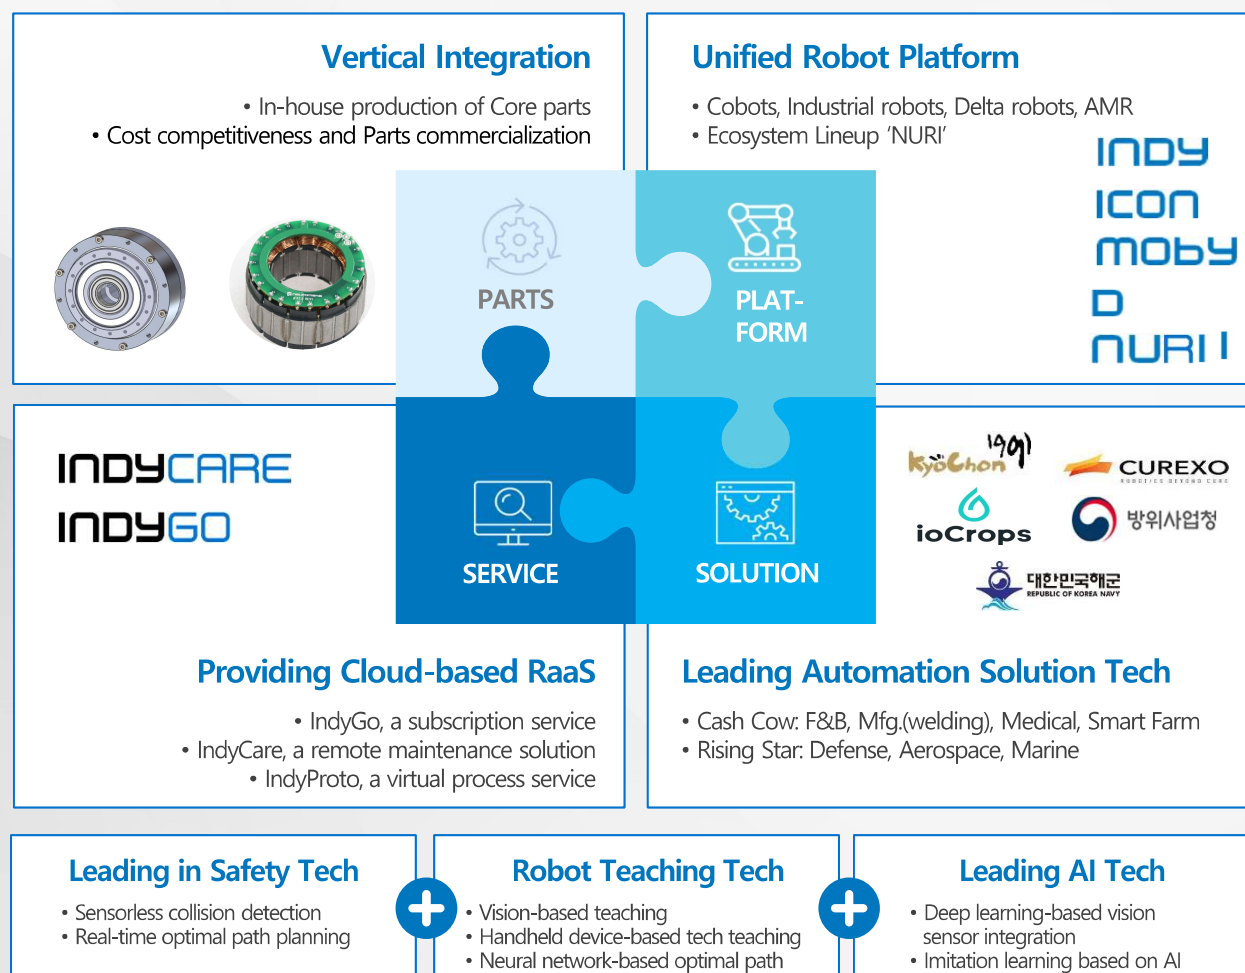

Sustained growth with an average annual sales growth rate of 57.4% since establishment, transitioned to a full-fledged growth trajectory in 2024

## Vertical Integration & Business Diversification

**Vertical Integration:** Vertical integration of the entire value chain of the automation business, including **PARTS, PLAT-FORM, SOLUTION, SERVICE.**

**Ecosystem Development:** Leading in development and market

### Sales

(unit: KRW, million)

## Main Business

ROBOT AS A TOOL  
ROBOT AS A SERVICE  
ROBOTS FOR EVERY WORKPLACE

A broad portfolio of robots, including collaborative robots, industrial robots, and autonomous mobile robots

Beyond simple manufacturing, we continue to strengthen our technological competitiveness by internalizing key components.

### Parts

**Core Smart Actuator**

Can be used for custom robot designs tailored to the user's specific needs.

**IndyEye Vision Solution**

An optimal vision solution for collaborative robots that delivers both performance and affordability.

**STEP Controller**

Real-time embedded EtherCAT master robot controller

**Conty Teach Pendant**

All-in-One teach pendant for collaborative robot programming

### Platform

**Indy**  
Collaborative Robot

**OPTi**  
Welding-Specialized  
Collaborative Robot

**NURI C Series**  
High-Payload  
Collaborative Robot

**NURI S Series**  
Low-Payload  
Collaborative Robot

**Icon**  
Industrial Collaborative Robot

**Moby**  
Autonomous Mobile Robot (AMR)

**D**  
Delta Robot

## Main Business

ROBOT AS A TOOL  
ROBOT AS A SERVICE  
ROBOTS FOR EVERY WORKPLACE

With comprehensive manufacturing capabilities, we offer fully integrated automation solutions from robot platforms and automation systems optimized for industry-specific needs to automation services (RaaS).

### Robot Platform

#### Welding

Automated Welding Robot

#### F&B

Frying

Coffee

#### Logistics

Palletizer

#### Manufacturing

Machine Tending

#### R&D

Lab Automation

Lab Automation

#### Medical

Joint Surgery Robot

#### Smart Farm

Moby-Agri

### Service RaaS Platform

**INDYGO**  
Collaborative Robot Platform Service

**INDYCARE**  
Collaborative Robot Remote Management Service

## Sales Estimate

Expanding beyond simple robot platforms into automation solutions by leveraging in-house production lines and value chain capabilities, achieving higher revenue growth compared to competitors.

\*In 2024, Neuromeka surpassed the sales of competitor R and demonstrated strong performance in the collaborative robot market.

### Neuromeka revenue trend

### Comparison of major robotics companies' performance

#### Comparison of major robotics companies' 2024 revenue

Surpassed Company R in 2024,  
Achieved No. 1 position in Korea in 2024

#### Annual revenue growth rate of major robotics companies

Leading the way for safe  
and convenient automation

# 02

## Growth Engines

- Continued identification of growth engines
- Internalizing core components - Motors
- Expanding platforms - Ecosystem lineup "Nuri"
- Expanding platforms – Autonomous mobile robots
- AI integration
- POSCO–Neuromeka Strategic Partnership
- DN Solutions–Neuromeka strategic partnership

With simple and cost-effective  
robot platforms and solutions

# Continued identification of growth engines

Four Strategies for Business Diversification: Expanding platforms, advancing solutions, internalizing components, AI integration

Promoting partnerships with strategic collaborations

## Internalizing components

- Complete the internalization of components
- Strengthen quality and cost competitiveness

## AI integration

- Imitation learning for dual-arm high-speed collaborative robots

## Expanding platforms

- Ecosystem lineup, collaborative industrial robots

- Gripper

## Advancing new solutions

- Machine tending

Platform: Dual-arm high-speed collaborative robot

Solution: Machine tending

Markets: Steel, rechargeable batteries

# Internalizing core components - Motors

Developed 6 types of motors and applied to company models

Examples of motors and applications developed for different specifications

Strategy to internalize production and commercialize motors

Internalizing components  
and promoting  
commercialization  
across the robotics  
industry

- Neuromeka CORE series Frameless Motor
  - Capable of producing all existing and new items
- Capacity to produce motors outsourced by client companies
- Capacity to modify processes based on client requests
- Capacity to produce 20,000 units annually per single product

## Expanding platforms - Ecosystem lineup “Nuri”

Integrating various collaborative robot lineups using NURI (Neuromeka Unified Robot Interface)

Establishing a robot automation ecosystem centered around systems integration (SI) that allows for the operation of various industrial and collaborative robots through the same software and user interface

## Expanding platforms - Collaborative industrial robots

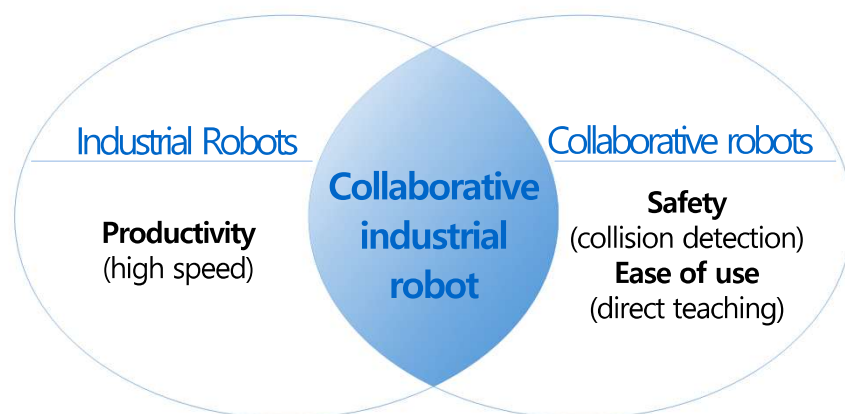

The manufacturing robot market is expected to see growing demand for high-performance robots that offer productivity, safety, and ease of use. Leveraging its accumulated technology, organizational capabilities, and product infrastructure, Neuromeka has launched a collaborative industrial robot to gain early market leadership and expand its market share.

### New demand in the manufacturing robot market: Collaborative industrial robots

#### Segmented market and customer base

Existing  
collaborative robots

Traditional  
industrial robots

Collaborative industrial robots offer greater flexibility and productivity beyond the limitations of traditional industrial robots.

### Expected benefits and competitive advantages

- Neuromeka's diverse lineup of dual-arm and high-payload collaborative industrial robots has strong potential to expand into new segments of the industrial robotics market.
- These robots can be introduced into mass production lines of large enterprises where traditional collaborative robots have limitations. By entering and capturing early market share, Neuromeka can establish strong first-mover advantage, raise barriers to entry, and generate high profitability through technological competitiveness.
- Rapid market penetration will allow Neuromeka to solidify its competitive edge.
- Unlike conventional industrial robots, collaborative industrial robots are designed with enhanced safety and have acquired ISO 10218-1 certification. This allows Neuromeka to offer distinct hardware and software advantages in actuators, mechanisms, and controllers compared to traditional industrial robots.

#### Expected Buyers

#### Main Applications

Small and medium-sized  
manufacturers

For processes where productivity becomes an issue when using standard collaborative robots

Collaborative industrial  
robot + automation  
solution

For automation companies seeking high productivity in welding, machine tending, or press operations without safety fencing

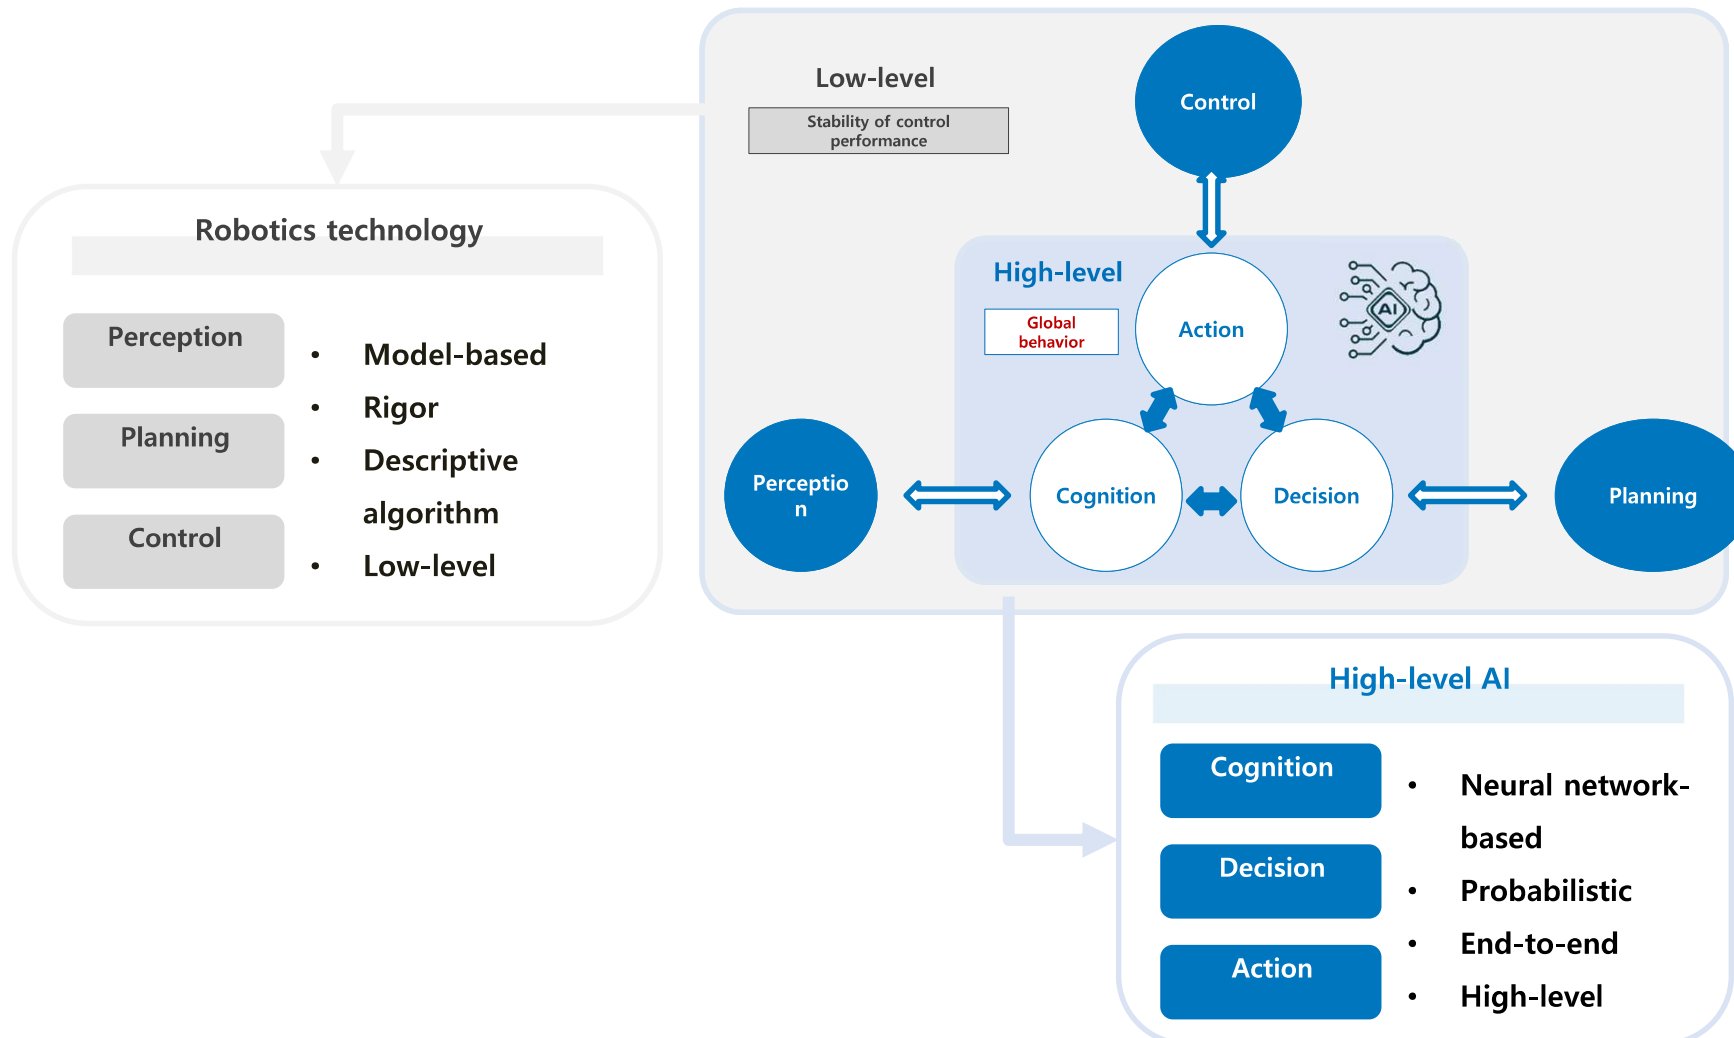

Automation equipment  
manufacturers

Semiconductor manufacturing automation

# AI integration

## AI integration strategy in robotics

## POSCO–Neuromeka Strategic Partnership

Neuromeka is a key strategic partner in POSCO Group's 20 trillion KRW investment in production line automation and has established a joint research center at POSCO's Pohang plant to strengthen collaboration.

### POSCO Group's Expansion of Production Line Automation Investments

**POSCO Holdings Chairman Jang In-hwa:**

*We'll realize a smart factory where AI and robot technology converge beyond smart operation.*" (Maeil Business Newspaper, 2024.09.05)

**POSCO to invest up to 20% of its total production line investment into automation by 2030** (E-Daily, 2024.04.15)

### Neuromeka signs strategic partnership with POSCO Group

Joint development of robotics-based automation solutions for manufacturing sites through collaboration between the two companies.

**Signed MOU on investment agreement (April 2024)**

**Joint research center established for robot-based process automation (Oct 2024)**

**10 billion KRW strategic investment from POSCO Holdings (Dec 2024)**

**Ongoing process automation projects with POSCO Group (2025)**

**Signed 3 billion KRW supply contract with POSCO (July 2025)**

#### Step. 1

**Established on-site track record (Completed)**

Executing multiple automation projects

#### Step. 2

**Advancement of automation platform (Under joint research)**

Expanding the scope of process automation through joint research and development

#### Step. 3

**Expansion of automation adoption within POSCO Group**

Secondary battery

Strengthening industrial automation competitiveness through enhanced collaboration with **POSCO Group**

#### Broad industrial robot lineup:

Industrial robots, mobile robots

#### Extensive experience in developing robots for various manufacturing and service sectors:

Manufacturing, welding, and F&B robots

#### In-house R&D capabilities with cutting-edge robotics technology:

Reinforcement learning, imitation learning, manipulators

#### Selection of robotic solution

development items to improve group-wide safety and productivity per worker

Development of standardized robotic automation processes based on domain knowledge in materials industry

Providing concept design and robot testbed tailored to on-site needs

## DN Solutions–Neuromeka strategic partnership

The integration of machine tools and robotics to automate precision tasks, along with the development of a software platform that allows unified control of robots and machine tools from various manufacturers.

### DN Solutions 2024 revenue breakdown: domestic vs. export share

DN Solutions 2024  
Domestic and international  
revenue: **2.1 trillion KRW**  
(consolidated basis)

(Unit: 100 million USD)

### Global machine tool automation market size

#### Key growth drivers

(Unit: 100 million USD)

Increasing adoption  
of collaborative  
robots

AI-integrated system  
control

Remote monitoring  
and data collection

\*Source: Business Research Insights (2025)

Korea's leading  
robot control  
technology company

The world's 3rd largest  
machine tool company

Development of  
AI-based  
integrated control  
system

Control of machine  
tools and various  
robots from a single  
platform

Expansion of  
process  
automation such  
as machine  
tending using  
robots

Provides greater ease of use  
compared to competitors  
through the development of  
an integrated software  
control solution

Entry into the  
global machine  
tool automation  
market

Expansion of business  
scope through DN  
Solutions' global  
supply chain

**50 billion KRW equity investment from DN Solutions (Mar 2025)**

Expansion of machine tool automation business based  
on an integrated software platform
