

Pioneering the new era of
cryptocurrency exchange

Version 1.0
2018. 12. 01.

PRIXBIT Sharing Economy

Listing Authority

- Community Vote
- Exchange IEO

PRX token holders have 1 vote to participate in the exchange community listing vote. One or more community listing will be pursued at least every 100 days to list cryptocurrency favored by the community. One or more IEOs will be pursued each quarter to promote the long-term value of the exchange by providing opportunities to trade and purchase promising IEO cryptocurrency.

Transparency Policy

- Data Analysis
- Project Due Diligence

We will promptly and transparently disclose statistical data regarding daily trading status, airdrop status, trading volume, and burn. When the exchange conducts IEO or listing, project due-diligence report will be openly available to the community.

Sharing Economy

- Airdrop
- Ecosystem Fund
- Fee Rebate

PRIXBIT utilizes PRX tokens to realize a sharing economy. 85% of the commission fee will be used for ecosystem activation. The PRX token is also refunded to the trader through the trade mining system.

PRX Token Economy

PRX tokens are used to give incentives to the Prixbit Exchange ecosystem participants. We provide airdrop with token holders and support projects for ecosystem development through the operation of the Prixbit fund and pursues the long-term value of the Prixbit token value through token burn procedures. In addition, traders who are active in Prixbit will receive a PRX token through a trading fee refund scheme.

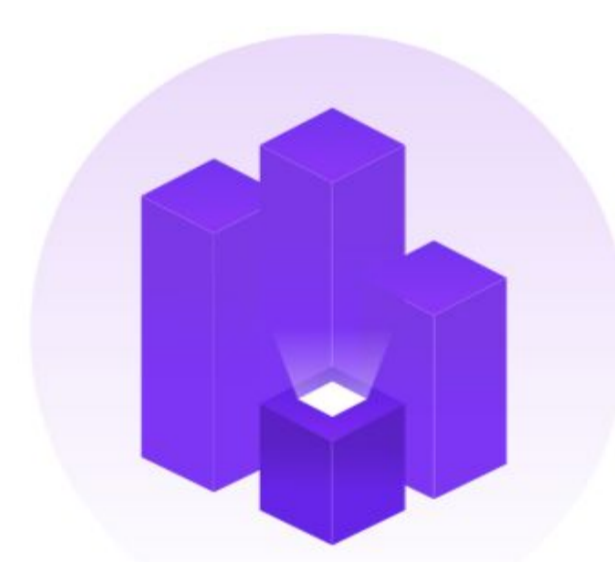

Trade Mining

PRIXBIT trade mining system is designed to aim an equilibrium balance between traders and holders to increase the long-term value of the exchange ecosystem.

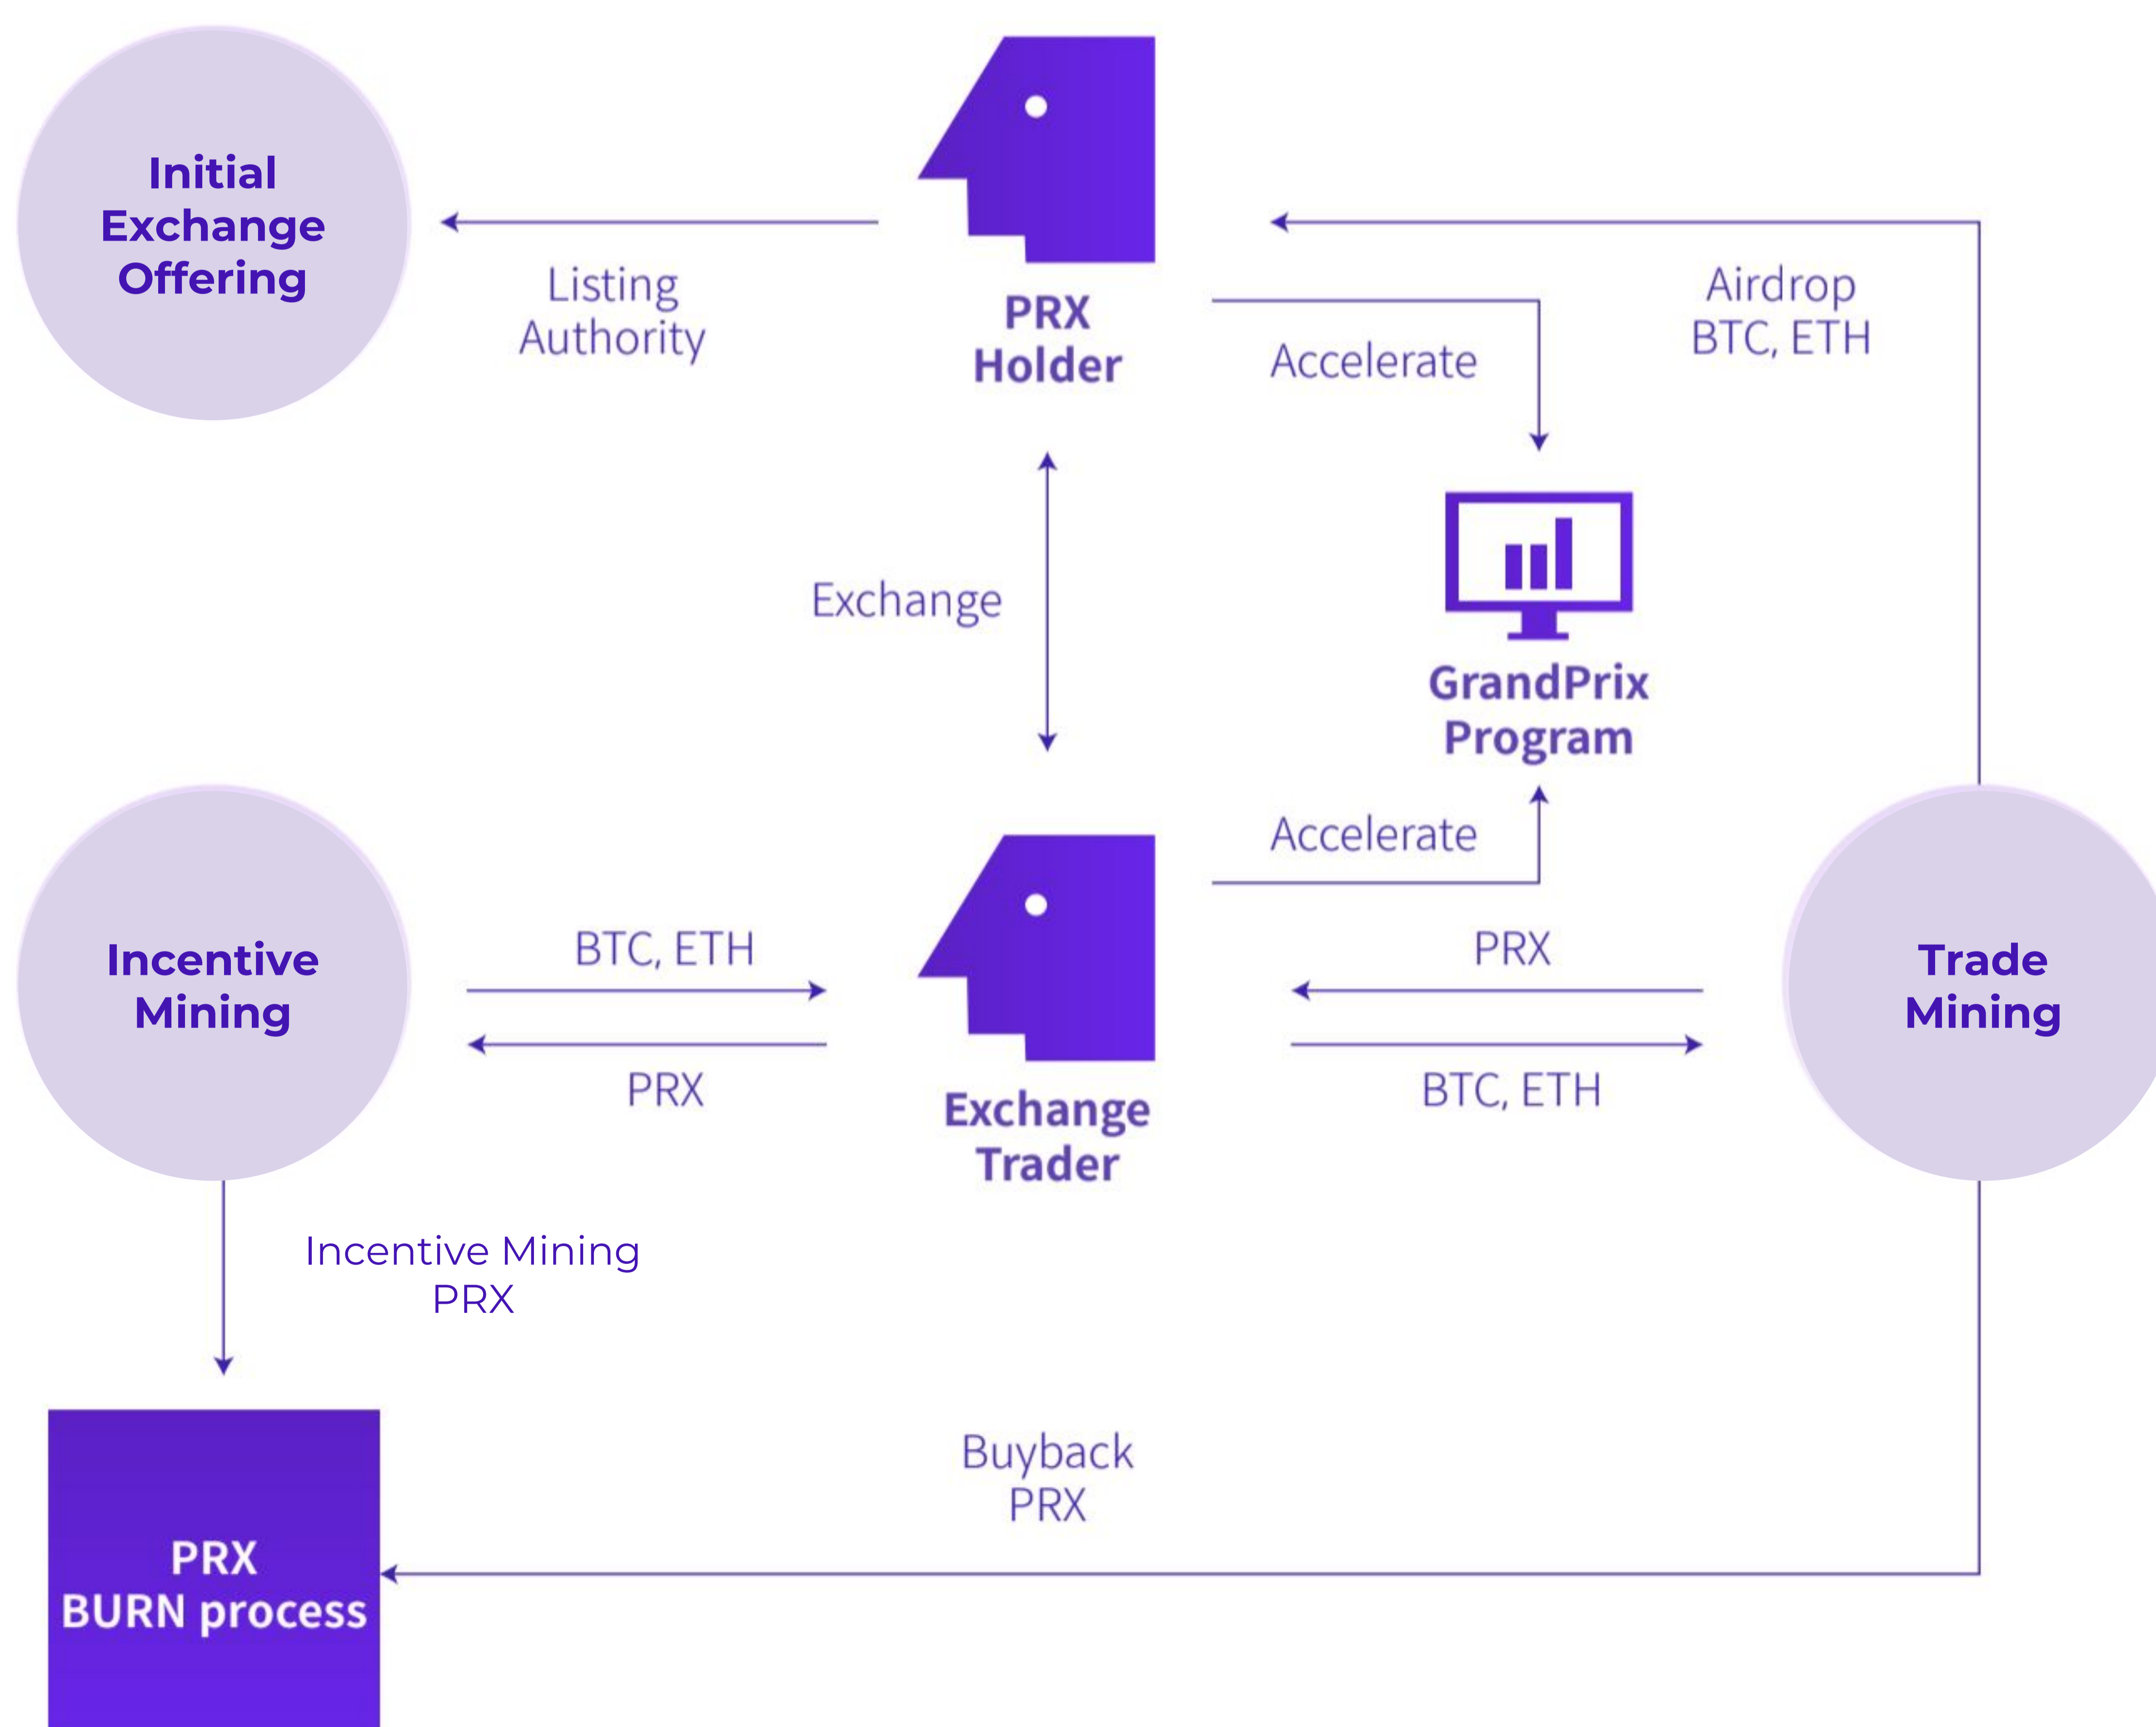

Incentive Mining

Introducing Incentive Mining, a new mining model that brings long-term value increase of PRX by continuously burning PRX through transactions.

Grand Prix Program

Grand Prix Program introduces an additional model that can accelerate profit and balance between traders and holders

Strategy and Roadmap

KRW asset-backed KRWX stable coin

PRIXBIT exchange will issue KRWX using KRW deposited in the exchange as collateral. We will lay the groundwork for the convergence of the cryptographic money market by raising the reliability through 100% payment reserve ratio, third party escrow service, and external audit.

Phase 1 - Early (2019)

- TO Genesis Event
- Launch Exchange
- Trading Mining
- Incentive Mining
- Grand Prix Program
- KRWX Stable Coin

Payment Gateway

PRIXBIT Exchange will be a leader in accelerating the development of the blockchain industry by acting as a hub and a payment infrastructure simultaneously. The KRWX issuance plan will also serve as the basis for providing a cryptocurrency service that can be used without restrictions on payment.

Phase 2 - Youth (2020)

- Payment Gateway
- Offline Digital Asset Exchange
